Subject: Proposed Microsoft Settlement - Hell No

What a joke. Microsoft would be getting over on the DOJ COMPLETELY if this settlement is allowed to go forward as it is now. This would completely defeat the judgment of monopoly against this arrogant corporation.

Please, for the sake of the educational consumer market, do not allow this sneaky attempt to saturate the education market by Microsoft with their shoddy software and the inferior hardware that it runs on. It will only increase the recipient school's expenses in the long run as these computers and the Windows operating system is very problematic and requires more technical assistance and maintenance than systems based on the Mac OS or Linux.

Thank you for your consideration of this viewpoint.

Sincerely John Muse
